OUR PRODUCT

U Trough screw conveyor

Tubular screw conveyor

BUCKET ELEVATOR – Z TYPE

A bucket elevator is a mechanism for conveying bulk grain materials vertical direction. A bucket elevator can elevate a variety of bulk materials from light to heavy like as snacks , dry fruits , frimes , etc.

RIBBON BLENDER

The ribbon blender mixes free-flowing raw materials within a U-shaped trough. A horizontal agitator consisting of precisely pitched inner and outer helical ribbons moves materials in a well-balanced axial and radial flow pattern. High-quality ribbon blenders feature tightly controlled clearances between the trough surfaces and agitator tips. Good design and expert fabrication ensure fast repeatable mixing, easy clean-up, low maintenance, and long service life.

BELT CONVEYOR

A belt conveyor system is one of many types of conveyor systems. A belt conveyor system consists of two or more pulleys, with an endless loop of carrying medium the conveyor belt that rotates about them. One or both of the pulleys are powered, moving the belt and the material on the belt forward. Industrial and manufacturing applications for belt conveyors include package handling, trough belt conveyors, trash handling, bag handling and more.

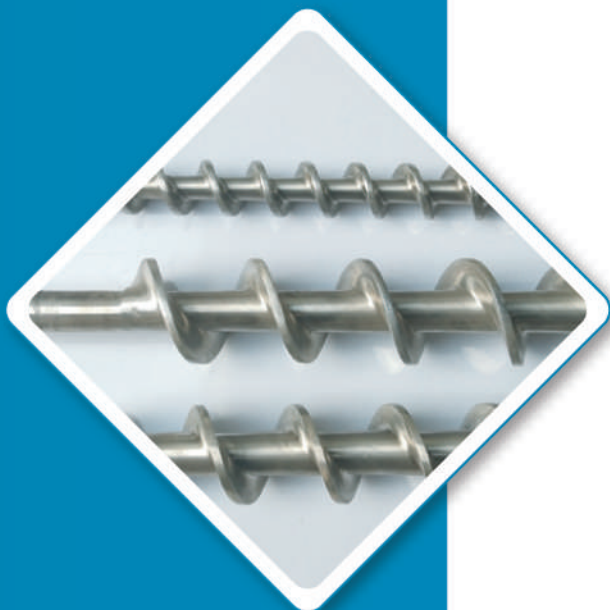

VERTICAL MIXTURE MACHINE

Used in small space area, they consist of a vertical screw which takes material to the top where it falls back down again, and repeats that process to mix materials. Suitable for all kind of plastic raw material & color mixing, virgin, regrind & master batch mixtures will have effective result. Vertical mixers are able to perform uniform mixture for large volume of material in short mixing time.

ROTARY AIRLOCK VALVE

Rotary airlocks valves are commonly used as a component in a bulk or specialty material handling system. Rotary airlock valves are primarily used for discharge of bulk solid material from hoppers or bins, receivers, and cyclones into a pressure or vacuum-driven pneumatic conveying system.

AUGER SCREW

We manufacture customized auger screw for pouch packaging machines, plastic extruder machine etc.

OUR MISSION

We understand your requirement exact what you want by technology solutions that makes achieve results you want and improve performance. We provides you to best equipment that helps you become more eligble and compititive today market. We maintain relation with customer for a log time because customer satisfication is our prime thing.

OUR POLICIY

Our main aim is providing Best Quality Equipment to our valuable customer. We improve day by day new implement in our equipment by customer review & give you best equipment. Also we provide service support by professional engineer as early as possible.

MANUFACTURE MACHINES FOR VARIOUS INDUSTRIES

WHY US?

- We can provide you customize solution in all conveying equipment.
- Trouble free working with high performance
- We have deployed specialized & experienced manpower in our workshop that's why we maintain our quality.
- We have a dedicated team for quick customer support which is available for 24 hours and 7 days. You can contact us via, Phone, Email, Call or whats-app.
- Highest level of customer satisfaction
- Our R&D team is fully equipped with all technologies which help us to new implement in products with market review.
